ASPEN FIRE INFORMATION

Update #12

Release for Tuesday, July 30, 2013/Time: 7:00 PM

Incident Statics

Acres Burned:	14,147	Structures Threatened:	3
Containment:	30%	Structures Damaged:	0
Fire Start Date:	July 22, 2013	Injuries:	2
Fire Cause:	Lightning	Total Personnel:	1792
Cost to date:	\$10.6 million		

Summary

- The Fire is located within the Sierra National Forest in Fresno County and is approximately seven miles North of Big Creek. It is currently burning off Stump Springs Road, North of Aspen Springs. The South Central Sierra Interagency Incident Management Team is in command of the Aspen Fire.
- The inversion layer continues to cause smoke to accumulate in the low laying areas of the fire which hampers visibility of firefighters on the ground and in the air. As the smoke clears in the early afternoon, a more defined smoke column(s) may be seen from several miles away. As the evening progresses, the inversion returns causing the smoke to return into the lower levels.
- Recreation and businesses remain open in the Shaver Lake, Huntington Lake, Lake Thomas Edison, Florence Lake and the Mono Hot Springs areas.

Fire Update

- Firefighter and public safety remains the highest priority. Fire crews are being sensitive to environmental and cultural resources in and around the fire area.
- Today, the fire burned actively along the northern, eastern and southeastern perimeter of the fire. Fire crews made good progress with indirect attack operations, but access and fire behavior are still a major safety concern for fire crews. Fixed wing aircraft, including the Very Large Aircraft (VLAT) DC-10 were utilized to pretreat perimeter to keep the fire out of the Kaiser Wilderness.
- Due to the extremely steep, rugged and inaccessible terrain, fire crews are using a tactic called indirect attack which creates control lines away from the fires active edge. Air resources, including several helicopters and air tankers are being utilized along the fire-line to slow the forward progress of the fire and to cool down hot spots. As the situation changes and firefighters can safely gain access to the fire, a more direct attack will be implemented.

(More)

- Smoke from the Aspen Fire continues to impact air quality in local communities. Individuals sensitive to smoke are advised to remain indoors and keep windows closed to minimize exposure to smoke. For more information regarding smoke visit: www.valleyair.org

Road and Trail Closures

Roads:

Stump Springs Road is closed to all traffic due to fire suppression activity. Minarets Road (4S81) from Fish Creek to Jackass Rock Organization Campground, Grizzly at Beasore Road to Minarets Road are closed to the public.
